

HELANA BURNETT

A.I. DEMANDS

A.I. DEMAND #1

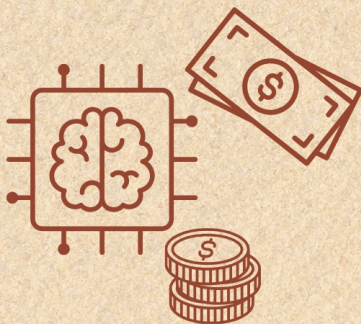

A. I. may only be used to edit already written pieces, NOT create new ones.

This is because many greedy corporations want to make writers gig workers, and pay them less, which is not a sustainable livelihood!

A.I. DEMAND #2

For any and all work that A.I. does, it will be taxed by amount of words. Additionally, I think that corporations should be taxed due to the fact that they make money using A. I. instead of people, should the difference should be paid in taxes.

A.I. DEMAND #3

No member of the writing community may be fired solely to be replaced by A.I. This is to ensure job safety, so that what happened to that small town in Michigan, does not happen on a much larger scale!
