

# WRITERS ARE NEEDED!

## 1. Extra taxes for AI automation

A prime example of what happens when you don't demand these taxes is Saganaw, Michigan. No taxes and lots of AI.

## 2. AI shouldn't be able to learn of writers work

If the writers don't give permission, you can't steal their work.

## 3. Writers should be able to use AI

Even though AI can't write whole films, it is still a useful tool and should be allowed to be used. This is true for lots of the 47% of jobs that are going to be lost
